

Making Your Own Paper Airplane

Follow these basic instructions on making a paper airplane below and you will be flying your own paper airplanes in no time.

Fold an 8.5" x 11" paper in half vertically.

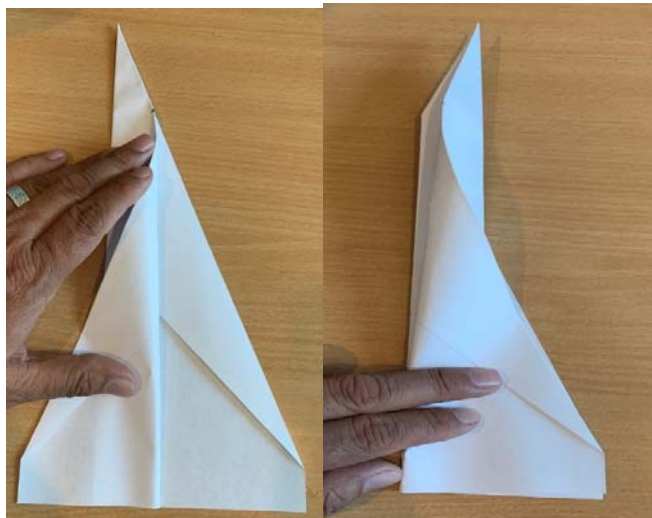

Now, fold each of the top corners into the center line.

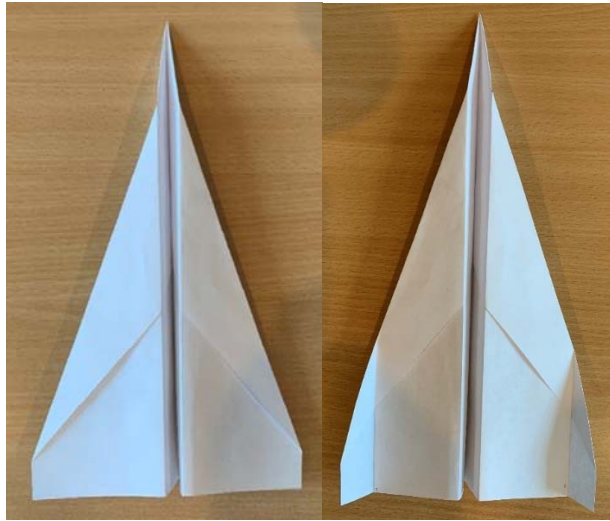

Fold each side of the pointed top to meet the edge of the previous fold.

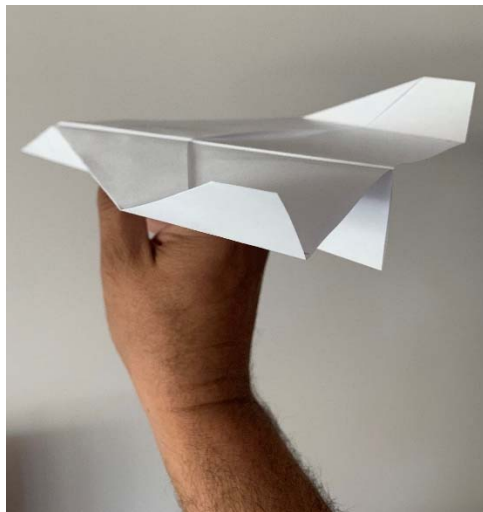

Fold the 8.5" x 11" paper in half vertically.

Fold the wings down, one inch from the bottom of the airplane and matching the top edges.

Open up the wings of the paper airplane. Next, fold each wing bottom edge up one inch.

Your paper airplane is flight ready.
